About Tezo Doors

Durability

Security

Design

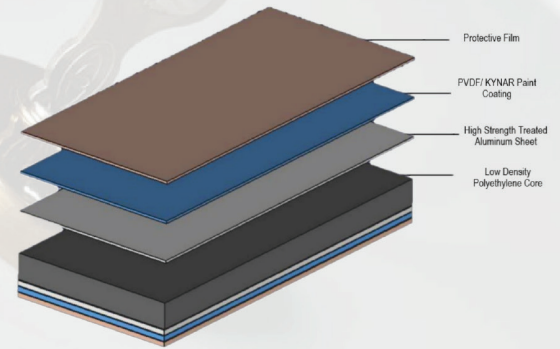

Tezo Doors is a manufacturer of exclusive custom doors. Our doors are made of ACM(Aluminum Composite Material), an innovative material used in construction. Tezo Doors has the ability to manufacture doors of any size and design, and we stand behind the quality of our doors.

Our Product

ACM (Aluminum Composite Material)

Aluminum Composite Material is an innovative material constituted of two reinforced aluminum panels bonded to a low density polyethylene core. ACM has remarkable resistance and strength, making it the perfect material for doors.

Commonly used in construction for cladding, siding and manufacture of doors and windows, its main characteristics are: durability (paint and finish were designed to maintain its quality and look under any weather condition), incomparable elegance, no maintenance required, good acoustic and thermal protection, incombustible and light weight. Because of it's versatility and numerous colors and finishes, ACM is the perfect material for your front door, making each project unique and exclusive.

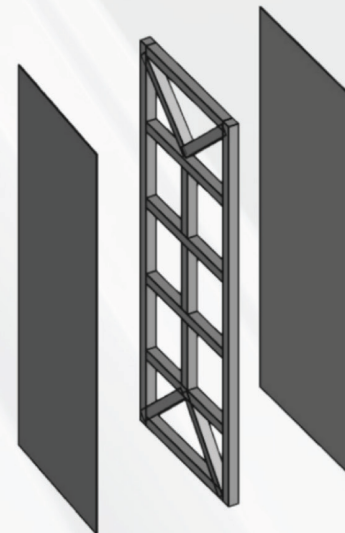

Structure

Our door structure is made of a grid of reinforced aluminum profiles that are professionally engineered to remain stiff regardless of the size and design of the door.

The gaps in the grid are filled with insulating material to ensure a perfect thermal-acoustic insulation.

ACM panels are industrially bonded to the structure, resulting in a beautiful door that will remain stiff and elegant for a long time.

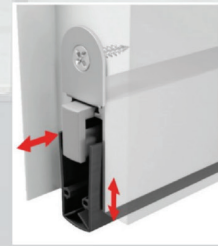

Features

Sealing Systems

Automatic Drop Seal - Top and Bottom

An automatic drop-seal mechanism that is activated when the door is closed, to keep water, dirt and insects out of the house.

Q-LON Double seal - Door and Jamb

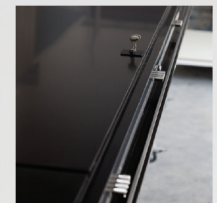

Swiss engineered Q-LON strips added to the door and jamb to completely seal the door against climate, water, dirt and insects.

Security

Locks and bolts

Swiss engineered locks with the highest grade in the industry. Offering options from 4 to 24 locking points that are activated with one single key.
